

Fall Final Project
Edmund Wu - ewu1985@bths.edu

Project Overview

My project is about [applications of] Artificial Intelligence.

The Pages

- index.html - Home page, portal to other pages
- ml.html - General information of Machine Learning, visuals?
- pathfinding.html - General information of Pathfinding, A* or so
- rl.html - General information of Reinforcement Learning, (Q|Deep)-Learning?
- implementation.html - Explanation of the code used for the Pathfinding demo

User Interaction

- Demo of A* or some other way of doing pathfinding, such as potential fields, WebGL or p5.js?

Variables

- Being lazy.

Presentation

- I would not care if I had to present my website to the class but I would prefer not to.
 - o My presentation will consist of reading off the board and going through the pages.

Works In Progress

- For WIP 1, I will have completed most if not all of the project.
- For WIP 2, I will have completed the project.
- For WIP 3, I will have completed...
- For WIP 4, I will have completed...
- For WIP 5, I will have completed...
